MATT CARVING

Matt carving surface enhances your interior with a shimmering effect under light, adding depth and sophistication

SHADE VARIATION

There is no shade variation in the production process. Produced by raw natural materials and due to combustion, tiles naturally have color variations in the same batch and from batch to batch.

Therefore, manufacturers limit the amount of shade variation in the carton box by sorting the tiles coming from the production line.

QUICK TIPS

- View tiles as a carpet of tiles and not as individual pieces
- Before installation, it is recommended to check the desired effect with a dry lay first.
- It is also ideal to view the dry lay effect under lighting condition which is as close as possible to the final lighting condition.
- When using one type of tile within the same area, it is recommended to use tiles from within the same production batch.

V1 UNIFORM FROM TILE TO TILE

Tiles have a harmonious shade and texture with low minimal variation

V2 SLIGHTLY NOTICEABLE FROM TILE TO TILE

Tiles have a slight variation in shade and texture

V3 MODERATELY NOTICEABLE FROM TILE TO TILE

Tiles have a moderate variation in shade and texture

V4 DISTINCTLY NOTICEABLE FROM TILE TO TILE

Tiles have a random or substantial variation in shade and texture, and each piece of tile may be in shade to one another

For special cutting & accessories products please contact our sales representatives for color & type available

INSTALLATION RECOMMENDATION

Open the box and arrange tiles for desired random effect. Install with following arrow sign / APW logo on the back of tile.

Clean the surface before Installation.
To minimize lippage, use 1/3 offset pattern instead of 1/2 offset.
Use tiling gap 2-3 mm (polished tile) or 3-4 mm (unpolished tile).

Allow the newly installed granite flooring to remain undisturbed for a minimum of 3-4 days before grouting. A longer curing period is recommended for optimal results.
